

1. A _____ is a small but high speed storage are found is most modern CPUs.
(a) instruction set (b) Address bus (c) processor Register (d) Printed circuit board
2. A/An _____ is the single transaction between the system memory and the CPU
(a) Bus cycle (b) Bit mode (c) Data unit (d) I/O cycle
3. Flash CS6 is an example of _____ software.
(a) Multimedia (b) utility (c) presentation (d) specific purpose application
4. Special encoding schemes are used to _____ files using fewer bits of data then the original to reduce disk space.
(a) Decode (b) Compress (c) Scatter (d) Fragment
5. Concentric circle on the magnetic surface of the magnetic disks are know as _____. The track on the disk surface are divided into invisible segments known as _____.
(a) Tracks, sector (b) platters, Actuator (c) sports, Arms (d) Actuator, sports
6. _____ is closely associated with computer related crimes.
(a) Word processing software (b) malicious software (c) crimious software (d) cruel software
7. _____ is a type of 2D barcode, consisting of an array of black and white squares.
(a) Smart code (b) square code (c) bubble code (d) QR code
8. Which of the following scanner has a glass window where the document/object is placed for scanning?
(a) Drum scanner (b) Flatbed scanner (c) Hand held scanner (d) All of these
9. Software or hardware filters that adjust the loudness of specific audio frequencies are called _____.
(a) Equalizers (b) Boosters (c) Acoustics (d) Compound meters
10. In the computer graphics, ZUI stands for _____.
(a) zoomed used internet (b) zoomed used interface
(c) zoomed used interaction (d) zoomed used interchange
11. Category of multimedia progresses without any navigational control.
(a) Linear (b) Non-linear (c) continuous (d) non –continuous
12. In multimedia terminology, _____ is an invisible line, drawn along a character's pose, so that the character's pose will follow along the line
(a) keyframe (b) Line of flow (c) Line of action (d) Layer
